

Madalina Pastiu

Atlanta, GA, USA || Email: mada.pastiu@gmail.com || Portfolio: <https://maddiepst.github.io/>

GitHub: <https://github.com/MaddiePst> || LinkedIn: <https://www.linkedin.com/in/madalina-p-52a01396/>

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React, Next.js, Vite, Responsive Design, Accessibility (WCAG)
- **Backend:** Node.js, Express.js, Java, REST APIs, JWT and OAuth Authentication, API Design, Role-Based, Access Control (RBAC)
- **Databases:** SQL, PostgreSQL, Supabase, Data Modeling, Query Optimization
- **AI / LLMs:** OpenAI API, Claude, Gemini, Groq, LangChain, LlamaIndex, Retrieval-Augmented Generation (RAG), Prompt Engineering
- **Tools:** Git, GitHub, Postman, VS Code, Figma, CI/CD Basics, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer | Exatect — September 2025 – Present

- Shipped 7+ features across a data/analytics platform serving 200–500 users - contributing to both initial product launch and ongoing platform improvements within a 2–3 person engineering team.
- Overhauled navigation, load performance, and accessibility compliance, reducing friction for 200–500 users and improving platform adoption by delivering a faster, more intuitive experience.
- Accelerated frontend development by building a 10+ component reusable React library - standardizing UI patterns across the platform and reducing time-to-ship for new features.
- Improved platform reliability for 200–500 active users by optimizing 10+ API endpoints and SQL queries - cutting average response times by ~15% under real production load.

Full-Stack Software Developer | Freelance — 2023 – Present

- Designed, developed, and deployed 20+ web applications for real clients and portfolio projects - owning the full lifecycle from requirements through production maintenance.
- Delivered AI-powered features and automated workflows across 20+ projects by integrating 25+ third-party APIs - expanding each product's capability beyond standard CRUD functionality.
- Secured 10+ production applications with a single unified auth architecture – JWT, OAuth, protected routing, and persistent user management with zero reported auth failures across all deployments.
- Shipped responsive, mobile-first interfaces across all 20+ projects - achieving cross-device compatibility from day one with no post-launch layout.

PROJECTS

AI Supervisor Assistant

React, TypeScript, Node.js, OpenAI API, LangChain, RAG, Supabase, Groq

- Built a full-stack SaaS application where managers upload a PDF spec and an AI pipeline auto-generate tasks, staffing roles, and team assignments - compressing project setup by 70%.
- Eliminated manual HR internal screening by designing a candidate matching algorithm that scores team members across a 15-skill role map, ranks by match percentage, replacing a multi-step process with a single automated workflow.
- Removed manual task tracking entirely by engineering a 3-channel chat system where the AI interprets natural language updates and auto-mutates task status across 4+ database fields in real time.
- Replaced recurring manual status check-ins with a 2-role performance dashboard surfacing real-time task completion rates across all active projects, giving managers and contributors instant, always-current data visibility.

GitHub Repository Explorer

TypeScript, Node.js, APIs, Supabase

- Built and deployed a full-stack application enabling users to search, save, and manage favorite GitHub repositories - surfacing live data across millions of public repos via real-time GitHub API integration.
- Eliminated session loss by implementing a 3-layer auth flow (JWT + protected routes + Supabase persistence) - delivering a secure, fully stateful logged-in experience across sessions.
- Maintained consistent performance across 5+ core views on desktop and mobile - achieving cross-device reliability through scalable state management and responsive UI architecture.
- Shipped end-to-end as a live production demo - covering auth, third-party API integration, and persistent storage, demonstrating full-stack ownership from database to deployment

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Civil Engineering
University of Construction of Bucharest, Romania
- Oracle Certified Associate, Java SE 8 Programmer – Oracle
- The Complete JavaScript Course: From Zero to Expert! - Udemey
